

SPORTING & RECREATIONAL PORTFOLIO

Zauner Construction has completed many projects that have centered on the construction of sporting and recreational facilities.

Most prominently has been the construction of indoor basketball stadiums and multi-purpose halls for NSW Public Works schools. These constructions have included the building of timber sprung floors and the installation of sports equipment and fixtures in layouts that are required to meeting international standard sporting tolerances and formats. We have taken immense pride in achieving these standards every time, and have maintained the accrued specialist knowledge in house through our long serving staff members.

Completed sports facilities projects include:

Dickinson Oval Pavillion	\$600k
Albury Swim Centre	\$1.6m
Building the Education Revolution - 4 x Primary School Multipurpose Halls, South Coast NSW	\$5.8m
